

Spip

Description

Spip is a publishing system (CMS) , it contains many files installed on the server which allow you to use website generating scripts. The strong point of Spip lies in the fact that the management of the site can be divided between several people (designers, editors, administrators?). Moreover, Spip is the best CMS for the creation of multilingual sites. The community of users is very reliable and today Spip is often used for professional websites.

Installation

The installation procedure is the same for every module in OVH. You may see the manual here
